15M

Viva

5M

Design a React component that displays a random emoji each time a button is clicked.

10M

Develop a Feedback Form with star rating and comments in Angular.

15M

Viva

5M

Implement a Like button in React that increases the like count on each click.

10M

Create a Weather Info app showing temperature and weather conditions for different cities using static data in Angular.

15M

Viva

5M

Develop a React app to display a list of items (e.g., fruits, colors, or cities) using an array.

10M

Create a Quote Generator app that displays random quotes with authors in Angular using static data.

15M

Viva

5M

Create a React app with a dropdown list of animals. When the user selects one, display the selected animal name below.

10M

Build a Color Picker app in Angular where the user selects a color and applies it to a div box.

15M

Viva

5M

Create a React app that switches between light and dark background colors when a button is clicked.

10M

Design a Currency Converter app in Angular that converts between INR and USD using fixed conversion rates.

15M

Viva

5M

Create a React component that counts and displays how many times a button has been clicked.

10M

Create a Light/Dark Mode Toggle app in Angular that switches between two themes.

15M

Viva

5M

Develop a React app that generates and displays a random number every time a button is pressed.

10M

Develop an Angular app to display Student Marks Table including names, subjects, and marks.

15M

Viva

5M

Write a React app that displays a browser alert message when a button is clicked.

10M

Build a Timer or Stopwatch app in Angular with Start, Pause, and Reset buttons.

15M

Viva

5M

Build a React component with two buttons (+ and -) to increase or decrease a numeric value.

10M

Design a Routing Demo app in Angular with Home, About, and Contact Components.

15M

Viva

5M
